AURORA VISUAL DESIGN GUIDE

A working system for documents, props, screens
and promotional assets

WORKING STANDARD • 2026

The identity balances authority and danger

CORE IMPRESSION

**Canadian institutional
retro-futurism under pressure**

CREDIBLE

Official enough to feel issued by a real station or agency.

TACTILE

Props should look handled, printed, scanned, stamped or repaired.

URGENT

Orange signals action, danger and anomalies—never decoration alone.

A clear hierarchy keeps the fictional world readable

PRIMARY MARK

Station Aurora

Adventure title, crew
assets, station
documents

PARENT AGENCY

MAPLE

Official briefings, IDs and
mission-control material

SYSTEM MARK

H.A.R.O.L.D.

Terminal, diagnostics
and automated
instructions

EVIDENCE MARKS

In-world entities

Bank, betting, retail and
antagonist documents

Rule: only Station Aurora and MAPLE should behave like master brands. Other marks are story evidence.

Two colours carry the core identity

AURORA NAVY

#16253C

Authority • structure • night systems

EMERGENCY ORANGE

#A84420

Action • warning • evidence anomaly

RECOMMENDED SUPPORTING NEUTRALS

WHITE

COOL PAPER

DATA BLUE

ALERT TINT

INK

Typography separates station voice from evidence

DISPLAY	ORBITRON EXTRABOLD	Station titles, key labels and dramatic system states
SYSTEM	ORBITRON	Navigation, short instructions, codes and crew-card labels
OPERATIONAL	Aptos	Briefings, records and longer reading
DATA	Aptos Mono 2912 / ORBIT	Receipts, timestamps, keypad inputs and diagnostics

RESERVED: Dreaming Outloud Pro for rare handwriting. Choose one E.V.I.L. typeface before final production.

Station Aurora owns the page

USE

- One clear primary mark per asset
- Keep generous open space around the patch
- Use MAPLE as issuer or parent agency

AVOID

- Treating H.A.R.O.L.D. or E.V.I.L. as co-equal brands
- Placing the patch on busy imagery without contrast
- Enlarging the current 102 px patch for large-format print

Production gap: create a vector or high-resolution master of the Station Aurora patch.

Illustration should feel retro-futurist, not generic sci-fi

KEEP

- Navy machinery with warm orange failure points
- Visible wear, paper texture and practical equipment
- Canadian cues used as world-building, not decoration

AVOID

- Neon cyberpunk palettes
- Photoreal and cartoon styles mixed in one asset

Icons behave like station instrumentation

RULES

- Use a single navy icon family for modules and controls
- Keep icons flat, legible and printable in one colour
- Reserve orange for the active fault or required action

H.A.R.O.L.D. is a character mark; module icons should remain simpler than the mascot.

Props should look issued, handled and believable

RETAIL

Thermal-paper tone, mono data, imperfect alignment

BETTING

Distinct identities; restrained document layouts

BANK

Conservative typography and official spacing

CORPORATE

Cold, controlled and intentionally separate from Aurora

Believability comes from hierarchy, spacing, dates, signatures and material—not from adding more decoration.

Crew cards need one visual generation

STANDARDIZE

Use one illustration style, one crop ratio, one data order and one date format across the active crew set.

Digital screens should feel like the same station

H.A.R.O.L.D. // COMMUNICATIONS

> SYSTEM DAMAGE DETECTED
> AWAITING RECOVERY CODE

INPUT: ORBIT

COMMUNICATIONS RESTORED
NEXT MODULE AVAILABLE

INTERFACE RULES

- Navy field, white data, orange active state
- Short lines and visible system feedback
- Never advance twice for a repeated code

The strongest imagery already shares one world

Environment • technical diagram • crew illustration

The mark library supports both authority and misdirection

AURORA

MAPLE

H.A.R.O.L.D.

E.V.I.L.

B.A.D.

B.A.D. ALT

FISH & NUTS

BETTING

Keep alternates only when they serve a defined clue or production need; otherwise archive them.

The remaining design debt is specific and manageable

PRIORITY	DECISION	CURRENT ISSUE	RESOLUTION
P0	Station patch master	Current file is 102 × 102 px	Create vector/high-resolution master
P0	Crew illustration style	Current and legacy Alistair styles conflict	Choose active style; archive the other
P1	E.V.I.L. typography	Times New Roman and DownCity both appear	Select one corporate treatment
P1	Document templates	Props share ideas but not fixed layouts	Create briefing, evidence and memo masters
P1	Digital UI states	Only part of H.A.R.O.L.D. is implemented	Define five module states and feedback

Use this checklist before releasing any asset

If an asset cannot pass every check, label it **WORKING—not final.**

- ☐ One clear issuer and one clear purpose
- ☐ Navy and orange used with defined roles
- ☐ Typography matches the content type
- ☐ Images belong to the same visual generation
- ☐ Dates, names, acronyms and codes match canon
- ☐ Print size, contrast and crop have been tested
- ☐ Source file, export and archive version are named

NEXT: resolve the P0 decisions, then create reusable prop templates.
