URGENT

MICROMETEORITE STRIKE

FROM HAROLD

TO DR. SARAH LANCASTER

Dr. Lancaster, a micrometeorite strike has damaged Aurora. You appear to have struck your head during the impact. Preliminary scans suggest you may be experiencing memory loss.

Commander Helena Chen and Engineer Alistair Johnson are sealed inside the crew quarters. You are the only crew member currently able to reach the damaged sections.

You have located Engineer Johnson's emergency backpack. Some repair tools are locked inside its compartments. I have begun compiling the information you will need to open them.

My communications system is failing. Before we can proceed, you must restore the optical interface in the open pocket of the backpack.

FIRST ACTION / RESTORE THE INTERFACE

Find the six repair patches and the optical maintenance diagram. Match every patch to its outline, keep the same orientation, and transfer it to the corresponding position on the interface. Install all six patches, then scan.

I will guide you through the remaining repairs once the connection is res...
