Hnefatafl - board layout

(so I don't forget!)

This side: 14 dark, 6 light. King starts on the throne.

Escape = any corner.

Silly sausage me, I smudged part of the board with my wet museum ticket. Not to worry, for the 3rd attacker move solve this riddle. The attacker on the second-highest row steps up to the top row. For the last attacker move, you might have to look somewhere else for it.
